

pathlib short summary

Important methods to remember

For now, focus on these:

```
from pathlib import Path
```

Directory

```
Path.cwd()  
  
path.mkdir()  
  
path.mkdir(parents=True, exist_ok=True)  
  
path.exists()  
  
path.is_dir()
```

File

```
path.touch()  
  
path.write_text()  
  
path.read_text()  
  
path.is_file()
```

Path information

```
path.name  
  
path.suffix  
  
path.parent
```

Files

```
path.iterdir()  
  
path.glob("*.json")
```
